Table Building 2 Dico Building Material Samples.pdf

Tonya –

Here are the results tables. Does this help?

Subject: RE: Dico Building Demo FFS working doc

Mike, did you know whether this was 4 or 2 samples in b. below? I was hoping you could clarify. If not, let me know and I'll go digging through the file so we can get this memo finalized.

1. Building 1

- a. Building Use – This building was mainly used to house site boilers. No insulation was documented in the building.
- b. Sample analysis – Six samples were collected from this building and foundation in 2016. Sample results from the analysis for total concentrations of pesticides were compared to the TCLP regulatory level. Four (or Two)?? samples exceeded a 1:1 comparison for endrine and/or heptachlor. Of these two samples, only the coating on the west wall exceeded the 20:1 comparison.

Subject: Dico Building Demo FFS working doc

Tonya and Kristen:

Attached you will find our working version of the Word file with Erin's comments and our responses embedded. As I mentioned, the Word document hasn't gone through QC so please keep it internally and then discard later. Some costs could change from the results shown, depending upon how we resolve the questions. I'm also attaching the previous PDF version of the report, which is usual for looking at the figures.

Thanks. Have a nice weekend,

-Mike
